

T3Planet Chatbot (Aadi) Training Document

1. TYPO3 Extensions & AI Universe — The 6 Extensions

Extension	Purpose / What It Helps With	Key Features	When to Use	Watch Outs
T3AI (AI Assistant)	Main AI extension: content, SEO, translation, and image prompts	• Create pages/blog/news with AI • SEO optimization (meta, SERP preview) • Translation module • Media generation (images) • Copilot & prompts	When editors want to generate content, do SEO, or need image prompts	Needs AI API, no desktop size, contains
T3AA (Accessibility Assistant)	Improves accessibility (alt text, readability, etc.) features	• Generate image alt text • Bulk metadata • Simplify text	When site needs accessibility improvements	AI prompts, custom image review
T3AB (AI Builder)	Helps build custom blocks/forms using AI customization	• Content block generator • Developer templates • Form builder	When templates/extensions require customization	Requires designed knowledge, risk
T3AC (AI Chatbot)	Frontend chatbot for site support	• Train chatbot with FAQ/pages • Configurable responses • API setup • UI/placement options	When site needs FAQ/chatbot support	Requires proper training data, new
T3AL (Localization / Translation Tools)	Supports multilingual TYPO3 sites	• Translate & activate content • Translation logs • Glossary handling	When site runs in multiple languages	Quality varies by language, cost
T3AS (Specialized AI Support Tools)	(Specialized) features	• Styling/prompt storage • Auxiliary AI utilities	When specialized needs not covered by others	Less direct, possible overlap, may

2. Templates / Theme – T3Karma

T3Karma is a TYPO3 premium template/theme with multiple layouts and demo pages. Key training points for Aadi: - Installation & activation - Version compatibility & licensing - Upgrading & handling breaking changes - Customization (header, footer, navigation, fonts, colors, layouts) - Performance & SEO features (cache, responsiveness, image optimization) - Multilingual/localization support

3. Training / Support Use Cases

Aadi must handle common user questions such as: - Which extension fits a specific need (SEO, translation, accessibility, custom block, chatbot)? - How to install and configure extensions/templates. - Best practices for using AI output (always review/edit). - Troubleshooting common errors (API key missing, media generation failing, version mismatch).

4. AI Universe — Overall Guide

The AI Universe is the ecosystem of TYPO3 AI-powered extensions provided by T3Planet. Training points for Aadi: - What AI Universe means and how the 6 extensions fit together. - Combining extensions (e.g., AI Builder + AI Assistant + Accessibility tools). - Cost/licensing models (free vs premium, API usage costs). - Privacy and compliance (data handling, GDPR, permissions).

5. Sample Q&A; / Prompts Training

Example training pairs: Q: How do I generate a blog page with AI? A: Choose AI Assistant → New Page/Blog → Select prompt template → Refine → Publish. Q: I need to translate a page into French. A: Use AI Assistant translation module; enable language; review translation manually. Q: I want to build a custom block. A: Use AI Builder; define block layout; customize; test responsiveness. Q: Why is my image alt text missing? A: Check Accessibility Assistant configuration; regenerate alt text. Q: How do I update T3Karma? A: Backup site; check changelog; test in staging; then update safely.

6. Bot Behavior / Tone / Boundaries

- Always be clear, polite, and step-by-step. - Avoid jargon unless explaining. - Escalate complex cases to human support. - Admit when unsure instead of guessing. - Professional and supportive tone.
